**Evolution Markets to Host Renewable Energy Certificate Auction for the  
Massachusetts Clean Energy Center**

***-- Sale of 4,746 Massachusetts Class I RECs and 127 Massachusetts Solar Carve-Out II RECs  
Scheduled for May 6, 2021 --***

**White Plains, NY (April 27, 2021)** Evolution Markets Inc. announces today it will conduct an auction of Renewable Energy Certificates (RECs) on behalf of the Massachusetts Clean Energy Center (MassCEC). The auction is slated for May 6, 2021 and includes RECs from five separate projects. For this auction, MassCEC plans to offer 4,746 Vintage 2020 Massachusetts Class I and 127 Vintage 2020 Massachusetts SREC II Renewable Certificates generated in the calendar year 2020.

The auction will feature RECs generated by the following renewable energy projects: the Green Affordable Housing Initiative Photovoltaic Installation Aggregation project, the Fairhaven Wind LLC facility, the City of Brockton Brightfield project, the Jiminy Peak Mountain Resort Inc. facility and the and the 180 kW solar photovoltaic system installed at the Massachusetts Clean Energy Center Wind Turbine Testing Center (WTTC) in Charlestown, MA. Renewable energy certificates from each project have been approved by the Massachusetts Department of Energy Resources (DOER) as eligible sources under the Massachusetts Renewable Portfolio Standard (MA RPS). These RECs will be sold in two lots (one for Class 1 and one for SREC II).

“The upcoming MassCEC auction of credits from its renewable energy projects is from a diverse portfolio of in-state Massachusetts wind and solar facilities that are certified as Class I and SREC II renewable resources,” said Peter Zaborowsky, Managing Director, Environmental Markets at Evolution Markets. “The market for Class 1 and Solar RECs in Massachusetts has remained strong and in a well-defined price range as the 2020 trading period draws to a close and this auction brings needed supply to the market.”

Through the Renewable Energy Trust Fund, MassCEC promotes clean energy technologies and provides funding to help advance clean energy projects in the Commonwealth. For some projects, the agency has in the past entered into long-term agreements to purchase a portion of the renewable energy certificates, which are then sold to generate additional revenue for use in MassCEC programs.

The auction will use Evolution Markets’ proprietary online auction platform, EvoAuction<sup>SM</sup>. Bidders interested in participating are required to obtain a user account for Evolution Markets’ on-screen, secure auction platform, and may directly enter secure, confidential bids according to the rules of the auction. Bidders may also submit bids via telephone, on a recorded line, to be entered into the on-screen auction platform by Evolution Markets on their behalf.

Interested market participants may register with Evolution Markets by emailing Peter Zaborowsky at: pzabo@evomarkets.com. Qualified bidders will be provided a login ID and password, and they will be able to post bids beginning at 10:30 am EST on the day of the auction. All bids will remain anonymous to the market. Qualified bidders will be able to view all bids posted until the end of the open bidding period at 11:30 am EST on the auction day. Bidders that submitted bids during the open phase will then have until 12:00 pm EST to submit their final sealed bid either online or by telephone. Final sealed bids will not be available for viewing. Participants wishing to submit bids via telephone will have their bids entered into the online system by Evolution Markets.

An auction notice and REC Sales Agreement for bidder consideration are available from Evolution Markets and on MassCEC's website. Material questions about the auction, the generators, or other such information should be submitted in writing to MassCEC (details below) no later than April 30, 2021 at 12 p.m. EST, and will be responded to in written form no later than May 4, 2021 at 4:00 p.m. EST. Please see official Auction Notice for more details.

Questions regarding MassCEC programs should be directed to:
